## In The Claims:

The following claim set is pending:

- 1. (Previously Presented) A pesticide concentrate comprising:
  - a) 2-85% by weight water;
- b) 5-90% by weight of at least one pesticide comprising mesotrione, an agriculturally acceptable salt of mesotrione or a metal chelate of mesotrione;
- c) an amount of an ionic nitrate salt additive effective in reducing corrosion of metal surfaces, said ionic nitrate salt additive comprising ammonium nitrate; and
  - d) optionally, other formulation auxiliaries; wherein the ratio of component c) to component b) is less than or equal to 0.3:1.
- 2. (Original) The concentrate of Claim 1 wherein the pH of the composition is 6 or less.
- 3. (Previously Presented) The concentrate of Claim 1 wherein the at least one pesticide is in the form of a salt of mesotrione or a metal chelate of mesotrione.
- 4. (Original) The concentrate of Claim 1 comprising at least one formulation auxiliary in the form of a salt.
- 5. (Original) The concentrate of Claim 4 wherein the formulation auxiliary in the form of a salt comprises at least one alkali metal or alkaline earth metal chloride.
- 6-7. (Canceled)
- 8. (Previously Presented) The concentrate of Claim 1 wherein the at least one pesticide comprises a copper or zinc chelate of mesotrione.
- 9. (Original) A pesticidal composition obtained by diluting a concentrate according to claim 1 into a suitable amount of carrier.

- 10. (Original) A pesticidal composition according to claim 9 wherein the carrier is water.
- 11. (Previously Presented) The pesticidal composition of claim 9 further comprising at least one member selected from the group consisting of herbicides, fungicides, insecticides, acaricides, and nematicides.
- 12. (Original) A method for the selective control of pests in crops of useful plants, which method comprises treating the useful plants, their seeds or seedlings or the crop area thereof with a pesticidal composition according to claim 9.

## 13. (Canceled)

- 14. (Previously Presented) The concentrate of Claim 1 wherein the pesticide concentrate comprises from 0.001 to 10 wt% of the ionic nitrate salt additive.
- 15. (Previously Presented) A pesticide concentrate comprising:
  - a) 2-85% by weight water;
- b) 5-90% by weight of at least one pesticide comprising mesotrione, an agriculturally acceptable salt of mesotrione or a metal chelate of mesotrione;
- c) an amount of an ionic nitrate salt additive effective in reducing corrosion of metal surfaces, said ionic nitrate salt additive comprising ammonium nitrate; and
  - d) one or more other formulation auxiliaries; wherein the ratio of component c) to component b) is less than or equal to 0.3:1.
- 16. (Previously Presented) The concentrate of Claim 15 wherein the at least one pesticide comprises a copper or zinc chelate of mesotrione.

- 17. (Previously Presented) The concentrate of Claim 15 wherein the pH of the composition is 6 or less.
- 18. (Previously Presented) The concentrate of Claim 15 wherein the pesticide concentrate comprises from 0.001 to 10 wt% of the ionic nitrate salt additive.
- 19. (Previously Presented) A pesticidal composition obtained by diluting a concentrate according to claim 15 into a suitable amount of carrier.
- 20. (Previously Presented) A pesticide concentrate comprising:
  - a) 2-85% by weight water;
- b) 5-90% by weight of at least one pesticide comprising a copper or zinc chelate of mesotrione;
- c) 0.001 to 10 wt% of an ionic nitrate salt additive effective in reducing corrosion of metal surfaces, said ionic nitrate salt additive comprising ammonium nitrate; and
  - d) optionally, other formulation auxiliaries; wherein the ratio of component c) to component b) is less than or equal to 0.3:1.
- 21. (Previously Presented) A pesticidal composition obtained by diluting a concentrate according to claim 20 into a suitable amount of carrier.
- 22. (Previously Presented) The concentrate of Claim 15 wherein said one or more other formulation auxiliaries comprise an alkali metal salt, an alkaline earth metal chloride, a surfactant, a thixotropic agent, an antifoaming agent, an antifreezing agent, a preservative, or any combination thereof.
- 23. (Previously Presented) The concentrate of Claim 15 wherein said one or more other formulation auxiliaries comprise a surfactant, a thixotropic agent, and an antifoaming agent.
